To Whom It May Concern:

I am writing to recommend Margaret Claypool for any Mathematics position at your school. Ms. Claypool served as South Bay Charter School's Mathematics Teacher for the past 3 months. During her brief time at South Bay, Mrs. Claypool has revitalized her classroom by bringing an engaging classroom presence that students have thrived under. Unfortunately, due stagnant student enrollment, the scope of Ms. Claypool's duties are being reduced at South Bay Charter School.

During Ms. Claypool's employment, she consistently demonstrated competence and knowledge in the subject area of Mathematics, and particularly Algebra. Ms. Claypool has expertly navigated the College Preparatory Mathematics curriculum that the District recently adopted. South Bay students are benefitting greatly from the positive and caring classroom environment she has provided. Margaret works well with faculty and administration, participates in staff meetings, and professional development. Additionally, Ms. Claypool has created a classroom website where parents and students can view assignments, take quizzes, and check their grades.

Ms. Claypool's service has shown that she is well prepared to teach a diverse student population and to provide high quality Math Education for all her students. It is my pleasure to recommend Ms. Margaret Claypool to any school district seeking an exceptional Mathematics Educator.

Sincerely,

Gary Storts
